

# Opulence

Opulence opens up a wider scope of possible design combinations with its large color library. Creative spaces can be enhanced by turning your flooring concepts into a finished product that contributes to your overall design and/or brand.

Opulence rugs can translate your original designs into an exquisitely precise rug. Our designers make sure your concepts are rendered to your specifications. The rugs are then fabricated at our manufacturing facility, where they are machine cut, inlaid and pieced together by hand. Then your order is shipped to the job site and inset by the flooring contractor. Opulence rugs may include but are not limited to logos, mascots, unique images or repeated patterns.

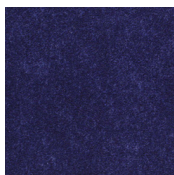

We combine our innovation and your creativity to create an attractive addition to any space. You can use shapes, colors and textures to design a floor that will help create an experience and communicate a brand message. Custom cutting can also be used in practical ways such as showing direction, dividing a space without using physical barriers, or aiding in educational activities in classrooms. From start to finish our designers and technicians will work to ensure your design vision matches the end result.
